

SWSEIC publications

SWSEIC have produced two A5 booklets about invertebrate groups in SW Scotland. The booklets cover **dragonflies** and **crickets & grasshoppers**, and focus only on the species recorded in Dumfries & Galloway and Ayrshire. Each booklet provides information on how to identify the species, and details about their local distribution and status. Each species account is accompanied by photographs (local where possible) and a map of the regional distribution.

Copies are available to purchase direct from SWSEIC. If you would like a copy posted to you please complete the order form below. Alternatively you can purchase (minus the postage costs) at the SWSEIC office (see below).
